PARKINGTARGET® in Use

Heavy Duty

Double Wheel Option

Hospital Bed ParkingTargets are a simple and effective way to prevent Hospital Beds from hitting the walls when moving beds into or around a patient's room. Hitting the walls can cause thousands of dollars in damage to vital and expensive medical equipment, walls, and jacks each year. Applying a **Hospital Bed ParkingTarget** to the floor in front of the wall makes it easy to park Hospital Beds in the "Same Place" Every Time! The Targets have solid surfaces and solid end caps, which make them easy to clean. They have Peel-n-Stick tape on the bottom, so they are easy to install on the floor. **Only ONE** is needed per bed and they are long enough to span most wheel bases. This simple solution is great for Hospitals, Nursing Homes, and other similar facilities. **Hospital Bed ParkingTargets** are a quick and easy way to consistently save time and money every year with less maintenance.
